

Know Where Your Facility Stands Before OSHA Does

A **Facility Safety Audit (FSA)** is one of the most effective ways to understand your facility's true compliance position.

Baldwin Safety Solutions' team of experienced safety professionals conducts a **comprehensive mock OSHA inspection**, identifying hazards and compliance gaps like what an OSHA Compliance Officer may discover during an official inspection.

Our **FSR** begins with a review of your **safety and health policies, training records, and OSHA 300 logs**. We then move to the **production floor for a detailed facility walkthrough** and conclude with **confidential employee interviews** to evaluate safety awareness and practices.

This proactive review helps your organization:

- Identify potential **OSHA violations and safe work practice non-conformities**
- Reduce safety risks by identifying **unsafe conditions and unsafe behaviors**
- Improve compliance with OSHA's **General Duty Clause** by strengthening workplace safety practices
- Strengthen your **overall safety culture and employee engagement**

Don't get caught unaware.

As the saying goes:

"You can only fix what you know is broken."

Let our experts help you identify the issues **before OSHA does**. Give **Baldwin Safety Solutions** a call **682.381.8680** to schedule an appointment, we can help.

 **Give us a call today and schedule your Facility Safety Audit (FSA).**
